

Water on Earth Count

Predict what percent of the Earth's surface is water (0-100%) _____

Count the number of squares of land and water in each column. If roughly 50% or more of the square is water, count the square as water. If roughly 50% or more of the square is land, count the square as land. Calculate the percent of the Earth's surface that is water and land.

	Total Sq. Count	Sq. Count of Water or Land	Percent (Sq. Count divided by 198 X 100)
Water	198		
Land	198
